

## **TIPS FOR SELECTING A QUALITY CONTRACTOR:**

**\$5,000,000.00  
Liability Insurance**

*It is important that you select a contractor who elects to have this coverage. Liability **is not** required by law.*

**Workman's  
Compensation Insurance**

*Contractors are required by Idaho state law to have this insurance. Ask for a certificate of insurance. This relieves your exposure to liability from a claim by an employee inured in the job.*

**Corporation Established  
Over 28 Years**

*We have been in business since 1975.  
We are a family owned and operated corporation.*

**Written Manufacturer or  
Company Warranty**

*We can provide you with a comprehensive warranty from our company as well as the Manufacturer.*

**Company Employees  
With Experience**

*We have our own workforce. Trained and highly experienced Foremen and Production Managers lead our employees.*

**Good Experience  
Modification Rate**

*A low Experience Modification Rate is a sign of a safe contractor and we are happy to report that ours is one of the lowest in the North West.*

**Bonded Contractor**

*As a bonded contractor, we can be an asset to your project with our current bonding limit of \$5,000,000.00*

**Licensed Applicator**

*Make sure that your contractor is licensed to apply your roof. We are licensed applicators of over 20 different roof systems*

**Good References**

*Check with General Contractors, Architects, the Idaho Roofer's Contractors Association, the National Roofing Contractors Association, or the Western States Roofing Contractors Association*
